

LEADERSHIP COMPETENCIES FOR MANAGERS (LCM)

Application: Management development designed to add thought leadership to the traditional role.

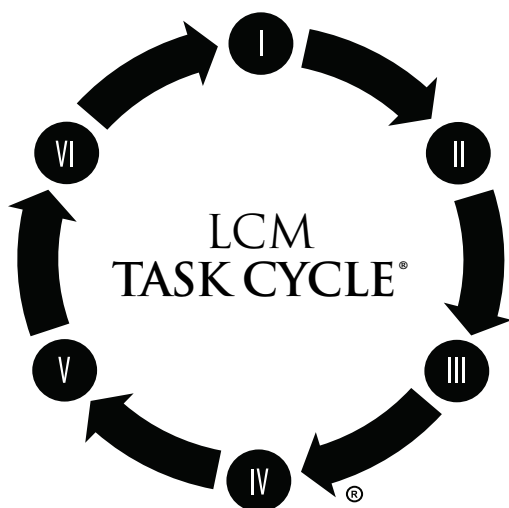

Audience: First-line and middle managers

Respondents: Self, Supervisor, Peers, and Direct Reports

Questions: 59 questions, 3 open-ended

Leadership Competencies for Managers (LCM) provides feedback on a manager's leadership and management skills. Effective managers have a good balance of work-oriented and people-oriented skills that allow them to achieve the goals and objectives of the organization. The management role is enhanced by strong leadership skills. Effective leaders create ideas and prepare the organization for change. The LCM combines the skills essential to both the management and leadership roles into one survey.

THE LCM TASK CYCLE®

The Task Cycle is a validated organizing tool that can help leaders know where to focus their development. It is presented as a logical sequence of events, with each phase contributing to achieving the final goal. A leader's performance across the Task Cycle phases is predictive of how others perceive their impact on the organization.
